

Automated Billing for Retail Management System!

Monthly.Yearly.Weekly...

With IMembership you can now automate the process of any recurring billing cycle like monthly rentals, yearly service contracts and more.

Rental Stores

Create rental plans that auto bill each member on an automated basis and allow a finite amount of rentals out with unlimited exchanges during that plan.

Given the climate of today's rental market place, due dates are out and recurring plans are in. With IMembership you can compete with the big boys and drive more traffic into your store. Generate a steady revenue stream and retain more customers!

Example: 2 movies billed per week \$6

Service Establishments

Service contracts, Phone contracts, Scheduled deliveries and more are set with ease and billed automatically to a customers account or billed directly to customers' stored *credit card.

Ideal Computer Solutions we use RMS and IMembership for all our Monthly/Yearly Service and Phone contracts.

Clubs/Organizations

Dues and fees can all be automatically billed using IMemberships ability to assign multiple recurring billing types. You can do both dues and fees on differing cycles. Using IMembership Manager you can pay existing account balances to their stored Credit Card. Use the filter to pay only certain accounts or purchases!
